

School Age Summer Camp 2022

We offer a full day camp experience for children who have finished Kindergarten through 3rd grade for children entering 4th grade September 2022. Our camp activities are based on monthly themes and will include trips. Our program allows time for children to work on summer enrichment packets, reading time and free choice for active games, board games and individual exploration. Every week we will prepare a snack or occasionally a lunch and add recipes to our cookbooks. Trips will be held on Wednesday's and Thursday's as often as possible, weather permitting. We hope to visit Core Creek Park, Bucks County Canal, Fall Township Park, Playwicki Park, Tyler State Park, Silver Lake, 5-Mile Woods, and Churchville Nature Center. Campers will need to bring a brown bag lunch, wear closed toe shoes, wear hats and sunscreen. All items should be labeled. Emilie will supply campers with a water bottle and lots of fun in the sun!

June- Outdoor Science and Waterpower - We will begin our summer by exploring the science of great outdoors. As always, we will have our vegetable garden. Tomatoes, cucumbers, maybe even pumpkins of a different squash. We will also grow herbs like parsley and basil, and a start a flower garden. In addition, we will explore solar and hydropower (waterpower). We will examine how water and sun can help us through scientific exploration.

July- Simple Machines - What are simple machines and how do we use them every day? We will explore how to make and use simple machines both indoors and out. We will make individual notebooks of these, then, our final challenge will be creating a Rube Goldberg machine!

August- Art Around Us - We will borrow a Traveling Trunk from the Michener Museum and explore the treasures inside. It is always filled with interesting art books, period clothing and fun treasures to play and create with. We are excited to dive into other art all around us!
